SUMMARY

Software developer with 3+ years of experience working remotely for international organizations and collaborating with multicultural teams. I develop complete web and mobile applications from design to deployment, with attention to visual fidelity and user experience.

EXPERIENCE

Redeem These Ashes *Illinois, USA (Remote)*

Mobile Developer (Frontend) Nov 2023 - Present

- Developed most of the frontend of an Android application using React Native, TypeScript, and JavaScript.
- Implemented frontend flows for login, registration, and forms, integrating with Firebase services.
- Created and redesigned interfaces in Figma, translating the designs into application screens and components.
- Implemented email functionality with Twilio SendGrid.
- Used Git and GitHub for version control and collaboration, with sprint-based planning and Kanban task tracking.

Global Play Brigade *New York, USA (Remote)*

Web Developer (Frontend) Nov 2023 - Jun 2024

- Implemented web pages and workflows using Bubble.io in collaboration with an international team.
- Contributed to discussions about functionality and design, working with a specialist to incorporate accessibility considerations into the project.

EDUCATION

Brigham Young University - Idaho *Idaho, USA (Remote)*

Bachelor of Applied Science in Software Development Expected 2028

Focus areas: programming, full-stack web development, and software engineering.

FUNVAL *Guatemala (Remote)*

Web Development Bootcamp Jan 2025 - Apr 2025

HTML, CSS, JavaScript, React, Tailwind CSS, API integration, Supabase, Git, and Scrum.

SKILLS
